PROFILE

Full Stack Engineer with 3+ years of experience building scalable web and mobile applications with strong backend expertise. Specialized in designing modular REST APIs and microservice-based systems using NestJS, Node.js, and TypeScript, along with high-performance frontends in React, Next.js, and React Native. Experienced in authentication, payments integration, dashboards, and production deployments. Focused on clean architecture, performance optimization, and delivering reliable, maintainable solutions for real-world business use cases.

SKILLS

Angular | React.js | Ionic | Vite | Next.js | React Native | Nest.js | Node.js
Typescript | Javascript | HTML5 | CSS3 | Material UI | TailwindCSS | SCSS
PostgreSQL | MySQL | Git | Postman | Redux | Recoil | AWS | JWT/OAuth
TurboRepo, MonoRepo, Python, Docker

EDUCATION

Master of Computer Applications (MCA),
University of Rajasthan, Jaipur, 2021 – 2023

Bachelors in Commerce (BCOM - Computers),
University of Rajasthan, Jaipur, 2018 – 2021

Intermediate

Sarwati Gyan Mandir, Dholpur, 2016 – 2018

PROJECTS

Travel Booking / Travel Management Project,
<https://sunrisetourtravel.netlify.app/>

Developed a full-stack travel booking system with package listings, search, filters, and seamless booking workflows. Built an admin panel to manage customers, bookings, payments, and agent-based reservations, with secure role-based access and real-time data updates.

Restaurant Food Delivery System

https://play.google.com/store/apps/details?id=com.thedeepg.ashirwad&pcampaignid=web_share

Engineered a mobile-first food delivery system with Android and iOS apps supporting cart, checkout, and secure payments. Designed an admin dashboard to handle order lifecycle management, customer data, menu updates, and transaction tracking with real-time API integration.

INTERNSHIP

Full Stack Developer Intern — Naresh IT (Hyderabad)
June - 2022 – Nov - 2022

Worked on building responsive web applications using React and Node.js, developed reusable UI components, integrated REST APIs, and assisted in implementing backend features and database operations.

Hindi

PROFESSIONAL EXPERIENCE

Full Stack Developer - Qnix Pvt Ltd

Mar - 2025 – Present

- Developing enterprise-level organization management platforms using React and TypeScript, enabling large teams to manage users, roles, workflows, and operational data efficiently.
- Architecting scalable frontend systems with reusable components, modular structure, and optimized state management for maintainable and high-performance applications.
- Designing and implementing a GIS research tool with map-driven workflows, supporting geospatial visualization, analytics, and real-time location-based insights.
- Integrated Google Maps and KML/GeoJSON layers to render custom markers, polygons, routes, and spatial datasets for interactive geographic analysis.
- Developed real-time data synchronization and API integrations, ensuring smooth communication between frontend and backend services.
- Contributed to React Native mobile applications, building cross-platform features and maintaining consistent UX across Android and iOS.
- Improved application performance, reducing load times and enhancing responsiveness for enterprise-scale users.

Technical Skills: TypeScript, JavaScript, SQL, React.js, React Native, D3.js, Google Maps API, KML, GeoJSON, Data Visualization, Recoil, REST APIs, Node.js, NestJS, JWT Authentication, MySQL, Microservices Architecture, Performance Optimization, Git, Postman,

Full Stack Developer - Codeprism Technologies Pvt Ltd

Jan - 2023 – Jan - 2025

- Led end-to-end development of enterprise-grade web applications using React.js, TypeScript, and NestJS, delivering scalable and maintainable full-stack solutions.
- Designed and built responsive frontend architectures with reusable components, custom hooks, and optimized state management, improving performance and developer productivity.
- Developed complex dashboards and admin panels with dynamic tables, filters, forms, and role-based workflows used by large-scale government and enterprise users.
- Implemented data visualization features using D3.js and interactive graphs, enabling users to analyze large and complex datasets efficiently.
- Improved page load performance by optimizing rendering, lazy loading, code-splitting, and API caching, resulting in faster UI responsiveness.
- Integrated real-time systems and voice/call workflows, ensuring low latency and high concurrency handling for production use cases.
- Created shared UI components, backend modules, and internal packages, standardizing architecture across projects and reducing development time.

Technical Skills: TypeScript, JavaScript, SQL, React.js, D3.js, NestJS, PostgreSQL, MySQL, REST APIs, LiveKit, Docker, Git, Postman, NextJS, Ionic, Angular, Redux
